SUMMARY

Computer Science undergraduate with hands-on experience in Machine Learning, Data Science, and Full-Stack Development. Skilled in building predictive models using Python, scikit-learn, Pandas, and NumPy, with experience deploying ML applications using Flask. Strong foundation in data preprocessing, model evaluation, and software development demonstrated through academic and industry projects. Seeking Machine Learning Engineer, AI Engineer, or Data Scientist opportunities.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, PHP, HTML5, CSS3

Machine Learning: scikit-learn, Pandas, NumPy, Data Preprocessing, Feature Engineering, Model Training, Model Evaluation, Classification, Regression

Web: Flask, Node.js, HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, WAMP

Core: DSA, DBMS, OOP

PROJECTS

Visitor Gate Pass System – VGPS (for BHEL Jhansi)

May 2025 – Jun 2025

Web-Based Security Management System

HTML, CSS, JavaScript, PHP, MySQL, WAMP

- Designed and implemented a secure web-based system for managing visitor access at BHEL Jhansi
- Developed role-based login portals for Admins and Security Personnel with password-protected access
- Enabled Admins to pre-register visitors through a dynamic form, with auto-generated unique visitor and day pass numbers.
- Built Security Portal for real-time visitor verification including ID proof upload, live photo capture, and printed gate pass issuance.
- Created a MySQL-backed system to store and update all visitor data and verification statuses across checkpoints
- Integrated features like pre-registration, real-time status updates, view/edit controls, and audit-ready visitor logs
- Enhanced physical security and digital accountability with QR code-ready printable passes and access tracking

MediPred2.0 – AI-Powered Disease Prediction System

Jan 2025 – April 2025

Machine Learning Web Application

Python, Flask, scikit-learn, Pandas, TypeScript, HTML, CSS

- Developed a full-stack ML web app for disease prediction based on user-inputted symptoms
- Trained and deployed ML models to detect diabetes, Parkinson's, heart disease, and mental illness
- Designed a user-friendly interface for quick, accessible health diagnostics
- Ensured high prediction accuracy and seamless interaction between frontend and backend

Farmify – Farm Management System

Aug 2024 – Jan 2025

Full-Stack Web Application

HTML, CSS, JavaScript, Node.js, MongoDB, OpenWeatherMap API

- Developed a responsive farm management website with real-time crop scheduling, inventory tracking, and weather monitoring.
- Built backend using Node.js and MongoDB to store crop data, schedules, and inventory records
- Integrated OpenWeatherMap API to fetch real-time weather data for better crop planning
- Created an interactive chatbot to assist users with crop schedules, soil health, and navigating the platform

EXPERIENCE

AI Virtual Intern

IBM (via IBM Developer Skills Network)

July 2025 - August 2025

Remote

- Successfully completed the PBEL Equivalent to Virtual Internship - AI (PBELAI1IN).
- Developed a Salary Prediction Project using machine learning techniques to analyze and forecast income levels based on diverse data features.
- Earned a passing grade and official certification validated by the IBM Technology Expert Labs.
- Qualified for a total stipend of ₹12,000 based on performance and project delivery.

Vocational Summer Trainee

BHEL (Bharat Heavy Electricals Limited)

May 2025 – June 2025

Jhansi, U.P., India

- Developed a Web-Based Visitor Gate Pass System (VGPS) to manage and track facility visitor entries
- Implemented secure role-based login for Admins and Security Personnel using PHP and MySQL
- Integrated live photo capture, ID proof upload, and auto-generated visitor pass numbers
- Streamlined visitor verification and pass printing processes across multiple checkpoints

EDUCATION

Bachelor of Technology in Computer Science and Engineering

VIT Bhopal University, M.P.

Expected 2027

Current CGPA:8.87

Class XII

Mahatma Hansraj Modern School, Jhansi, U.P.

22/07/2022

Percentage: 88%(Aggregate)

Class X

Sun International School, Jhansi, U.P.

15/07/2020

Percentage: 94%(Aggregate)

CERTIFICATIONS

- Certificate of Robotics conducted by Techkriti'24, Annual Technical and Entrepreneurial festival, IIT Kanpur
- Certificate of Artificial Intelligence conducted by Techkriti'24, Annual Technical and Entrepreneurial festival, IIT Kanpur
- Awarded with the certificate of achievement for the successful completion of SAWIT.AI Learnathon Program held on 21st September 2024; supported by Women Techmakers Google for Developers and HCLTech
- Certified in the Introduction to Artificial Intelligence (AI) – IBM from Coursera
- Certified in the JAVA Masterclass in 2025 course from Udemy platform
